

Idaho's *intriguing* Orchids

presented by
Lynn Kinter PhD

Idaho is home to 28 native orchids.

They occur in a surprising array of colors, shapes, & sizes, from the dainty little pink fairy slipper, to the stately peach & green stream orchid.

A few lack chlorophyll & leaves & parasitize other plants.

Some attract & funnel insect pollinators in unusual ways...

Lynn is lead botanist at the Idaho Natural Heritage Program, IDFG. She conducts research on rare native plants, including a threatened orchid, Ute ladies-tresses.

Join Lynn and others at one of the two February presentations to learn more about these fascinating and lovely native wildflowers!

FEBRUARY 2, 3:00-4:00 pm

North End Organic Nursery, 3777 W Chinden Blvd, Garden City
Free, but **please RSVP** to NEON: 208-389-4769

FEBRUARY 28, 6:00-7:30 pm

Library at Bown Crossing, 2153 E Riverwalk Dr, Boise
Free, presented by Harris Ranch Wildlife Mitigation Association
